

Trundy Institute

CADC/ CAC/ LADC Preparation Program

Summer/Fall 2026

New Day and Evening Classes Start:

Wednesday, July 8, 2026

Daytime track - Start in July complete by November!

Most classes are offered in an accelerated four week format!

Trundy Institute was created in 2003 to meet the needs of professionals working in the substance abuse treatment field who wish to prepare for the examinations for Certification and Licensing. Additionally, many individuals have attended who want to learn more about substance abuse or treatment, without having to travel outside of the Southeastern Massachusetts area.

The program consists of 300 classroom hours. Each class is offered multiple times a year. This program is designed to meet or exceed all of the educational hours required to qualify for the CAC- Certified Alcoholism Counselor and CADC-Certified Alcohol and Drug Counselor(formerly CADAC) offered by the Massachusetts Board of Substance Abuse Counseling Certification, as well as all three levels of Licensure in Massachusetts. The Massachusetts Board of Substance Abuse Counseling Certification and the Massachusetts Bureau of Substance Addiction Services(BSAS) have both approved this program.

This program consists of 10 courses and an optional Relapse Prevention training. These courses are thirty hours in length. This 300 education hour program meets the educational requirements for CAC, CADC and exceeds the educational requirements for LADCI, LADCII and LADCIII. This course does not fulfill the related work experience requirements.

Advanced students with related education may not need all courses

The following ten courses are each thirty hours in length

Participants starting in July 2026 who complete six classes by October 5, 2026, will meet the educational requirements for CAC and Registration with the Massachusetts certification board & be eligible to sit for CADC/LADC exam. It's possible to complete the entire 300 hour program by November!

- 1. Core Functions and Core Competencies of Substance Abuse Counseling.** This course will cover/review Screening, Intake, Orientation, Assessment, Treatment Planning, Counseling, Case Management, Referrals, Consultation, Record Keeping, Client Education and Crisis Management. Tap 21 will also be briefly reviewed.
- 2. Basics of Chemical Dependency Counseling.** This course will cover a practical approach to all aspects of treatment from the initial interview to treatment planning to the basics of individual and group therapy and more.
- 3. Ethics and Professional Responsibility in Substance Abuse Treatment.** This course will focus on helping participants better understand the ethical issues involved in the substance abuse treatment field, along with a better understanding of the related functions and responsibilities that are specific to substance abuse treatment.
- 4. Substance Abuse Treatment Related Issues.** This course will cover a variety of topics that are essential to understanding and treating substance abuse. Topics include but are not limited to: 1.Support Groups and other Self-Help programs 2.Domestic Violence 3.Sexual Abuse 4. HIV, HCV 5. Tobacco Addiction/Cessation and Cultural Sensitivity including but not limited to the issues of race, gender, sexual orientation, religious preferences and the concerns of and for individuals with disabilities. Additional issues will be presented and discussed.
- 5. Introduction to Treating Co-occurring Disorders.** This course will look at the basics of assessment and treatment of substance abuse and related mental illnesses. Through an experiential process it will look at the connective processes of assessment, treatment planning and case management. The class will review the most predominant mood, personality and other psychiatric disorders prevalent in substance abusing clients.
- 6. Counseling and Techniques in Substance Abuse Treatment.** This course will cover techniques used in substance abuse counseling including, but not limited to Rogerian, Gestalt, Rational-Emotive-Behavioral and Reality theories, as well as the foundational approaches such as Freudian, Adlerian, Jungian and Existential.
- 7. Multiple Participant Treatment: Group, Couples, Family and Intervention in the Treatment of Substance Abuse.** This course will focus on the role of family members and the treatment needed to assist family members in their recovery from the damage done by the chemical dependencies and related codependency issues. Participants will also learn the basic principles of intervention. Experiential exercises will be utilized during this course
- 8. Psychopharmacology of Abused Substances and the Connection to Co-occurring Disorders.** This course will examine the categories and classifications of various legal and illegal psychoactive substances of abuse. The interactions between drugs including prescribed drugs will be discussed with some emphasis on Co-occurring disorders related medications
- 9. Advanced Ethics in Substance Abuse Treatment and Co-occurring Disorders.** This course will build on the entry level ethics course and allow participants to go beyond the basics of ethics to a deeper understanding of the complexities of ethics in the substance abuse treatment field, along with a better understanding of ethics within related helping professions including but not limited to co-occurring disorders
- 10. Clinical Issues in Supervision.** *The direction of this class will be determined by the needs of the participants.* This class will focus on a clinical review of actual cases with an emphasis on ethical interactions and the proper implementation of the Core Functions and Global Criteria. *If they participate in the class while also performing a Practicum then the following applies: Practicum participants will work in an approved treatment setting under appropriate supervision. Individuals that are employed in an appropriate location will be allowed to utilize their present work site providing they are providing or are assisting at providing counseling services. These participant keep a journal of hours worked, daily activities, and the relationship of each to the Twelve Core Functions*
